OPTICS COMMUNICATIONS

Subject index to volume 115

Propagation and transmission in homogeneous media

On the propagation of the kurtosis parameter of general beams, R. Martínez-Herrero, G. Piquero and P.M. Mejías 115 (1995) 225
Design strategy of diffractive elements with prescribed diffraction angles in non-paraxial region, R. Bräuer and O. Bryngdahl 115 (1995) 411
In quest of *nm* accuracy: supporting optical metrology by rigorous diffraction theory and AFM topography, K.-P. Schröder, W. Mirandé, H. Geuther and C. Herrmann 115 (1995) 568

Propagation and transmission in inhomogeneous media

The contribution of high order Zernike modes to wavefront tilt, T.A. ten Brummelaar 115 (1995) 417
Optical characteristics of pulsed capillary gas lasers with waveguide resonators, S.V. Kukhlevsky and L. Kozma 115 (1995) 425

Optical information, image formation and analysis, optical computing

Breaking symmetry in the binary phase only matched filter, T.D. Wilkinson and R.J. Mears 115 (1995) 26
Phase filter design for efficient side lobe suppression in phase coupled CO_2 waveguide lasers array, G. Lescroart, R. Muller and G.L. Bourdet 115 (1995) 233
Shear measurement in digital speckle shearing interferometry using digital correlation, T.W. Ng 115 (1995) 241
Parallel arithmetic operations in an optical architecture using a modified iterative technique, A.K. Datta and M. Seth 115 (1995) 245
Optical cellular logic two-level networks for morphological image processing, B. Wang, L. Liu, F. Liang and Z. Wang 115 (1995) 251
Focusing light into a multiple-core fiber. I. Theory, S. Prasad 115 (1995) 354
Focusing light into a multiple-core fiber. II. Application to ground-based interferometry, S. Prasad 115 (1995) 368
Holographic counterfeit protection, C.E. Chesak 115 (1995) 429
A fake zoom lens for fractional Fourier experiments, A.W. Lohmann 115 (1995) 437
Correlation-like algorithm for superresolution analysis, S. Bosco and M. Trivi 115 (1995) 444
3D wavebeam field reconstruction from intensity measurements in a few cross sections, A.V. Chirkov, G.G. Denisov and N.L. Aleksandrov 115 (1995) 449
Three-coordinate measurement of an object surface with a combined two-wavelength and two-source phase-shifting speckle interferometer, T. Maack, G. Notni and W. Schreiber 115 (1995) 576

An improved polarization-encoded logic algebra (PLA) used for the design of an optical logic gate for a 2D data array: theory, F. Yu and G. Zheng 115 (1995) 585

Optical communications

A new optical pumping scheme using a frequency modulated semi-conductor laser for ^{4}He magnetometers, B. Chéron, H. Gilles, J. Hamel, O. Moreau and E. Noël 115 (1995) 71
$\chi^{(3)}$ effects on the nonlinear phase shifts from SHG in optical fibres, Y. Zhao, G. Town and M. Sceats 115 (1995) 129
Continuous-wave self-focusing and self-phase modulation in colloidal CdS microcrystallites, Q. Shen, P. Liang and W. Zhang 115 (1995) 133
Modal characteristics of EM wave propagation through a chirofibre with different core and cladding chiral admittances, A.K. Singh, P. Khastgir and O.N. Singh 115 (1995) 256
On the possibility of soliton generation at 1.06 μm, I.A. Goncharenko, A.B. Grudinin and D.N. Payne 115 (1995) 261
Time resolved one-dimensional optical waveguide microscopic imaging of the water drainage on vertical Ag/SiO_x interface, R. Lawall and W. Knoll 115 (1995) 265
An electro-optic Fabry–Pérot through-plane-modulator based on a Langmuir–Blodgett film, J.P. Cresswell, M.C. Petty, C.H. Wang, B.S. Wherrett, Z. Ali-Adib, P. Hodge, T.G. Ryan and S. Allen 115 (1995) 271
Tapered two-layer InGaAsP/InP waveguides for highly efficient chip coupling to single-mode fibers, R. Zengerle and W. Weiershausen 115 (1995) 453
Beat frequencies of up to 16 THz generated via modulation instability in birefringent fibres, S.G. Murdoch, R. Leonhardt and J.D. Harvey 115 (1995) 461

Atomic and molecular physics

Optical properties of a pair of spheres: comparison of different theories, G.B. Smith, W.E. Vargas, G.A. Niklasson, J.A. Sotelo, A.V. Paley and A.V. Radchik 115 (1995) 8
Measurement of different components of vibrations in speckle referenceless configuration using adaptive photodetectors, N. Korneev and S. Stepanov 115 (1995) 35
Simple equations for the calculation of a multilevel phase grating for Talbot array illumination, C. Zhou and L. Liu 115 (1995) 40
A variational derivation of the transverse vector wave equation for application to dielectric waveguide analysis, I.A. Erteza and J.W. Goodman 115 (1995) 52
Nonlinear intersubband plasmon polaritons in a quantum-well structure, A. Liu 115 (1995) 75
Time resolved spectral development of ultrashort pulse solitons in erbium fiber loop lasers, D.U. Noske, N. Pandit and J.R. Taylor 115 (1995) 105
Upconversion of 1.064 μm Nd:YAG laser pulses into intense visible light in erbium-doped phosphate fibers, Y. Lu, Y. Lu, H. Fang and N. Ming 115 (1995) 110
Light-induced diffusive pulling (pushing) of lithium atoms into a laser beam. Measurement of diffusion coefficients of lithium in 2P and 2S states in noble gases, S.N. Atutov, B.V. Bondarev, S.M. Kobtzev, P.V. Kolinko, S.P. Podjachev and A.M. Shalagin 115 (1995) 276
Strong coupling cavity physics in microspheres with whispering gallery modes, S. Dutta Gupta and G.S. Agarwal 115 (1995) 597

Condensed matter

Threshold accepting for constrained halftoning, T. Scheermesser and O. Bryngdahl 115 (1995) 13
Apodization for Gaussian beam incidence: numerical examination, K. Tanaka, K. Sakamoto, T. Tanaka and M. Taguchi 115 (1995) 29
The effect of phase fluctuation on absorption and dispersion in a ν medium, S. Gong and Z. Xu 115 (1995) 65
Synchronization of a femtosecond modelocked Ti:sapphire laser to the Stanford SCA/FEL, R.J. Stanley, R.L. Swent and T.I. Smith 115 (1995) 87
A 2.54 μm-pumped type II $AgGaSe_2$ mid-IR optical parametric oscillator, J. Kirton 115 (1995) 93
A longitudinal and side-pumped single transverse mode double-clad fiber laser with a special silicone coating, Th. Weber, W. Lüthy, H.P. Weber, V. Neuman, H. Berthou and G. Kotrotsios 115 (1995) 99
Scattered light enhancement near a phase conjugating mirror, S.I. Bozhevolnyi, O. Keller and I.I. Smolyaninov 115 (1995) 115
Raman scattering in the (Zn, Cd)Se/ZnSe quantum wells: comparison with ZnSe bulk material and film, B.P. Antonyuk, V.B. Podobedov, E.M. Dianov, P.A. Trubenko and E.A. Shcherbakov 115 (1995) 145
Optically-induced Anderson delocalization transition in disordered systems, S. Li, J.B. Khurgin and N.M. Lawandy 115 (1995) 466
Determination of the thermal expansion and thermo-optic coefficients of a bacteriorhodopsin film, Q. Wang Song, C. Zhang, C.-Y. Ku, M.-C. Huang, R.B. Gross and R.R. Birge 115 (1995) 471
Role of alkali ions on persistent hole burning in Pr^{3+}-doped germanate glasses, T. Suemoto, M. Namiki and K. Koyama 115 (1995) 475
Diffraction from a short-cavity Fabry–Pérot: Application to photorefractive quantum wells, D.D. Nolte and K.M. Kwolek 115 (1995) 606

Plasmas

Light scattering from a particle on or near a perfectly conducting surface, G. Videen 115 (1995) 1
Optimization of twisted nematic liquid crystal panels for spatial light phase modulation, M. Yamauchi and T. Eiju 115 (1995) 19
Optical pulse distortion measurement limitations in linear time invariant systems, and applications to polarization mode dispersion, B.L. Heffner 115 (1995) 45
Cubic phase compensation in solid-state ultrashort pulse lasers, C.M. González Inchauspe and O.E. Martinez 115 (1995) 80
Multiple gratings in semi-insulating GaAs crystal, S. Bian, J. Frejlich, B. Sugg and R.A. Rupp 115 (1995) 151
Observation of intensity correlations in the fluorescence from laser cooled atoms, C. Jurczak, K. Sengstock, R. Kaiser, N. Vansteenkiste, C.I. Westbrook and A. Aspect 115 (1995) 480

Lasers

Optical potential for atom guidance in a cylindrical-core hollow fiber, H. Ito, K. Sakaki, T. Nakata, W. Jhe and M. Ohtsu 115 (1995) 57

Measurement of the spatio-temporal response of photorefractive conjugation, A.D. Meigs and B.E.A. Saleh 115 (1995) 121
Thickness dependence of optical second-harmonic generation from ultrathin niobium films, O. Keller, A. Zayats, A. Liu, K. Pedersen, F.A. Pudonin and E.A. Vinogradov 115 (1995) 137
Optical nonlinear dynamics with cold atoms in a cavity, A. Lambrecht, E. Giacobino and J.M. Courty 115 (1995) 199
Pulse propagation in a Raman pumped, four-level medium that exhibits inversionless gain, A.S. Manka, M. Scalora, J.P. Dowling and C.M. Bowden 115 (1995) 283
Servo-loop based on heterodyne interferometry for injection locking of cw Nd:YAG lasers, N. Lesage, G. Mullot, Y.B. Andre and G.L. Bourdet 115 (1995) 291
Dynamics of transverse mode competition in vertical cavity surface emitting laser diodes, A. Valle, J. Sarma and K.A. Shore 115 (1995) 297
The general process in lasers, W. Tan 115 (1995) 303
Low order mode interaction in CO_2 lasers with different experimental configurations, I. Boscolo, L.A. Lugiato, F. Prati, T. Benzoni and A. Bramati 115 (1995) 379
Interferometric 2D imaging amplitude correlator for ultrashort pulses, I. Zeylikovich, Q.D. Liu, G. Bai, N. Zhadin, A. Gorokhovsky and R.R. Alfano 115 (1995) 485
High slope efficiency and low threshold in a diode-pumped epitaxially grown Yb:YAG waveguide laser, D. Pelenc, B. Chambaz, I. Chartier, B. Ferrand, C. Wyon, D.P. Shepherd, D.C. Hanna, A.C. Large and A.C. Tropper 115 (1995) 491
Fiber laser mode-locking by pump pulse induced cross-phase modulation: a numerical analysis, M. Wegmüller, W. Hodel and H.P. Weber 115 (1995) 498
Collective resonant Compton scattering by two-level particles, R. Bonifacio and L. De Salvo 115 (1995) 505
Power scaling of diode-pumped monolithic Nd:YAG lasers to output powers of several watts, I. Freitag, A. Tünnermann and H. Welling 115 (1995) 511
Pulse compression of the output from a diode pumped additive-pulse mode-locked Nd:YLF laser, A. Robertson, N. Langford and A.I. Ferguson 115 (1995) 516
Analytical calculations of switch-on time and timing jitter in diode lasers subjected to optical feedback and external light injection, J. Dellunde, M.C. Torrent, C.R. Mirasso, E. Hernández-García and J.M. Sancho 115 (1995) 523
Q-switching of a diode-pumped Nd:YAG laser with low uniform gain characteristics, J.M. Dawes, P. Dekker and Y. Cai 115 (1995) 617

Nonlinear optics

Spatial light modulator based on the control of the wavefront curvature, G. Vdovin 115 (1995) 170
Multi-soliton fission and quasi-periodicity in a fiber with a periodically modulated core diameter, R.G. Bauer and L.A. Melnikov 115 (1995) 190
Quantum noise reduction in a passive optical bistable system with a coupled linear external cavity, S. Li and F. Pi 115 (1995) 207
Mid-IR studies of third-order nonlinear optical susceptibilities with picosecond pulses, G. Seifert and H. Graener 115 (1995) 216
Experimental characteristics of spatial subharmonics in BSO, P.M. Johansen, R.S. Hansen and T. Olsen 115 (1995) 308
Intensity dependent two-wave mixing at large modulation depth in photorefractive $BaTiO_3$ crystal, C.H. Kwak, S.Y. Park and E.-H. Lee 115 (1995) 315

Non-critically phase-matched cascaded THG at 440 nm in $KTiOP_{1-y}As_yO_4$ crystals, J.P. Fève, B. Boulanger, X. Cabirol, B. Ménaert, G. Marnier, C. Bonnin and P. Villeval 115 (1995) 323
Analysis of grating formation with excimer laser irradiated phase masks, P.E. Dyer, R.J. Farley and R. Giedl 115 (1995) 327
Soliton propagation in a system with nonlinear gain, V.V. Afanasjev 115 (1995) 335
Phase singularities via nonlinear beam propagation in sodium vapor, T. Ackemann, E. Kriege and W. Lange 115 (1995) 339
Theoretical investigation of short pulse amplification near 1.3 μm in a high gain Pr^{3+}-doped fluoride fiber, H. Ammann, W. Hodel and H.P. Weber 115 (1995) 347
Coherent backscattering in nonlinear media, A. Heiderich, R. Maynard and B.A. van Tiggelen 115 (1995) 392
Detuning effects in transit-induced optical multistability, J.-M. Kim and A.T. Rosenberger 115 (1995) 401
Second order grating formation in dry holographic photopolymers, G. Zhao and P. Mouroulis 115 (1995) 528
Kerr lens mode-locking of a sub-picosecond optical parametric oscillator, R. Laenen, C. Rauscher and A. Laubereau 115 (1995) 533
Double phase-conjugate mirror: oscillation and amplification properties, N.A. Korneev and S.L. Sochava 115 (1995) 539
Spatial subharmonic instabilities in photorefractive crystals, Z. Sheng, Y. Cui, F. Wang and Y. Wei 115 (1995) 545
Controlling chaos may induce new attractors in an optical device, A. Gavrielides, P.M. Alsing, V. Kovanis and T. Erneux 115 (1995) 551
Spontaneous patterns formation in thin film of two-level centers with a wide-aperture optical feedback, A.A. Afanas'ev, Yu.A. Logvin, A.M. Samson and B.A. Samson 115 (1995) 559
Study of two-wave coupling in Cu:KNSBN using red light, H. Wang, M. Tian, J. Lin, S. Huang, J. Yu, H. Chen and Q. Jiang 115 (1995) 563
Photorefractive two-wave mixing with focused Gaussian beams, D. Fluck, S. Brülisauer and P. Günter 115 (1995) 626
